Relevos® TSE

Stabilize Terminal Server Resources

OPTIMIZES CPU AND MEMORY USAGE

Relevos TSE controls CPU and memory on Windows® terminal servers. It increases user capacity and eliminates user delays by ensuring no user or process can use the CPU at the expense of others. It does this by using a patented CPU Throttling algorithm, in addition to granular starting and monitoring of processes with Memory Limits, Process Priority, and Process Affinity.

BENEFITS

- ELIMINATES CPU AND MEMORY BOTTLENECKS
- SMOOTHES OUT APPLICATION RESPONSE TIMES
- SEAMLESSLY INCREASES TOTAL USERS PER SERVER
- TARGETS AND CONTROLS APPLICATIONS CONSUMING CPU/MEMORY
- PREVENTS USER DELAYS/STALLING
- FULL SERVER PERFORMANCE ANALYSIS

SIMPLE CONFIGURATION, POWERFUL RESULTS

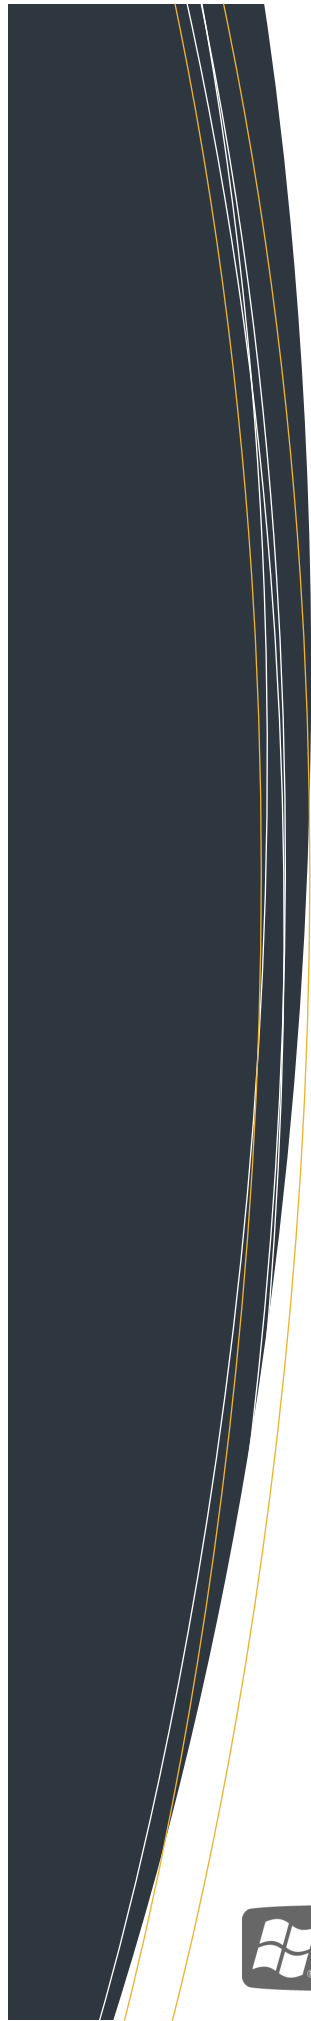

With Relevos, user capacity is increased (2 to 20 users, 30 to 60 users, etc.) without impacting performance. Relevos addresses the most critical issue of terminal server performance: user and application response times. Relevos identifies and contains processes that consume excessive CPU and memory. By accomplishing this with a minimum of overhead, the terminal server can concentrate on its primary purpose - serving applications to users.

- CPU Throttling - sets the max CPU % for processes
- Memory Optimization - sets the max memory for processes
- CPU Affinity - isolate processes on certain CPUs
- CPU Priority - start processes at a certain Priority

MANAGEMENT

Relevos automatically enables CPU Throttling and Intelligent Priority Control when installed, so users that experiencing intermittent stalls and slowdowns will immediately notice a performance improvement. And not only is it important to control your terminal servers, you'll want to know how the load is being distributed on the servers. Relevos records processes and users according to CPU usage, Memory usage, and user sessions. .

Our software has helped IT Departments worldwide by decreasing support and costs. Our solutions target everyday problems that exist within all organizations, regardless of size, industry, or location. From Fortune 100 companies, to small companies and home users, our software saves money, increases ROI, saves time, and helps the environment.

You can evaluate our software free of charge for 30 days. When you are ready to purchase, you can do so online, through your salesperson, or through one of our 135 resellers in over 15 countries. See how our software can provide your company real solutions that work.
