ShutdownPlus Green

Minimizes Power Usage of Windows Computers

MEETS COMPANY AND EMPLOYEE GOALS, SAVING \$100/YR/PC

BENEFITS

- SAVES \$10,000/YR IN ELECTRICITY FOR 100 COMPUTERS
- AN ROI OF 1200%/YR PER PC!
- REDUCES CARBON FOOTPRINT OF PCs BY 66%

SAVE MONEY, EASILY

An average of 64% of computers are left powered on, even with a company policy in place. ShutdownPlus Green still saves almost \$100/yr per PC.

Simple licensing terms keeps the software up-to-date with the latest technology.

Possible reimbursement from local and federal governments.

ShutdownPlus Green puts a computer into a low power state according to when employees are at work. Desktop computers consume up to 90% of the company's computer energy usage, so saving as much energy as possible on the desktop computers makes sense. However, employees want to work uninterrupted – without the computer going into Standby every 10 minutes during the work day. ShutdownPlus Green addresses both of these opposing needs, putting the computer into a lower power mode quickly during off hours, and only after a long idle period during working hours.

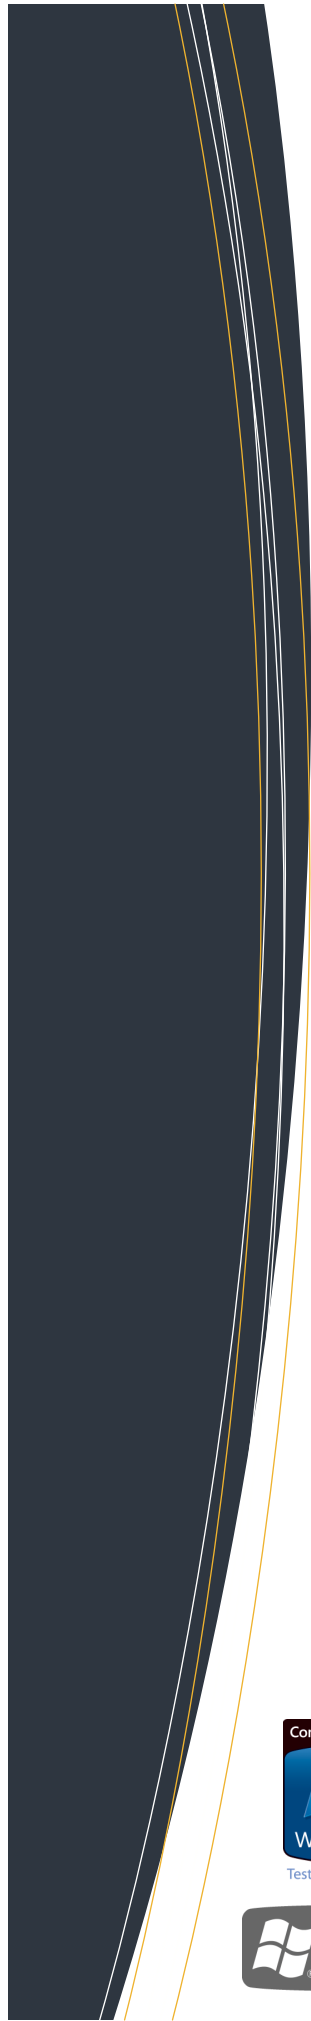

MANAGEMENT

ShutdownPlus Green is centrally managed with our Product Management Console product. Groups of computers can be setup and templates containing settings that are sent down to the workstations.

HOW IT WORKS

How do you save energy (money) on a computer? The maximum benefit is achieved by putting it into a low power state after a period of idle time. Windows has this feature built-in, but ShutdownPlus Green replaces this function and defines idle actions based on working time and non-working time. Additionally, ShutdownPlus Green can be setup to take a different action if no user is logged onto the computer. It can even power on the computer in the morning right when work starts. These options will make an immediate impact on energy management for your computers. You can even manage all of the ShutdownPlus Green clients through its Group Policies file or by using our WM Software Product Management Console.
