

# Safe AutoLogon™

## Securely and automatically logon to Windows

### FEATURES

- AES-256 bit encrypted secure automatic logon
- Protected settings, works with single sign-on software, logon if logged off, and many other features

### WHERE SAFE AUTOLOGON IS USED

- Hospital patient rooms and mobile workstations
- Retail Point of Sale systems
- Warehouse kiosks, forklifts
- City vehicles such as police, Fire, and EMT
- Classrooms

### SECURITY AND AUTOMATIC LOGON

Why automatically logon? What about security? Each company needs to assess the benefits of automatically logging on. A hospital that uses a single sign-on still has a need to get users logged into the workstation. Doctors, nurses, and hospital staff don't have to manage the logon name and password for Windows, and the IT staff can ensure HIPAA compliance. Point of Sale stations still need to get into Windows before their PoS software comes up. Library kiosks have a similar need to log into Windows seamlessly to run their library access software. And many more applications across all industries—anywhere automatic logon is needed.

Combined with a SALPS server, Safe AutoLogon clients logon as follows:

1. Before logon, the client contacts a SALPS server, sending the encrypted user logon name.
2. The SALPS server replies with the encrypted password.
3. The Safe AutoLogon client uses this password to proceed with the automatic logon.

Safe AutoLogon is the #1 automatic secure logon software for Windows. Used in hospitals, companies, warehouses, homes, classrooms, and kiosks worldwide, Safe AutoLogon is ready to meet all of your automatic login needs! And, when paired with our Safe AutoLogon Password Server (SALPS) software, companies get a complete solution to centrally manage their Safe AutoLogon clients. Because information security is the most important issue for most organizations, Safe AutoLogon encrypts the logon username and password in a high-encryption 256-bit AES format. Many other options such as locking the screen after logging on, local/domain permissions, and keeping users logged onto the computer are included. Safe AutoLogon runs on Windows Vista, 7, 8, and 10. It also runs on Windows Server 2008, 2008 R2, 2012, 2012 R2, 2016, and 2019.

### MANAGEMENT

Our SALPS server software stores the passwords used by Safe AutoLogon to logon to the domain. SALPS can also implement a company's HIPAA compliance or internal password policies. It has an automatic password generator that recognizes domain password complexity policy.

### BENEFITS

- Replaces unsecure logon methods such as clear text and storing passwords in the LSA.
- Point of Sale stations use Safe AutoLogon to log onto Windows automatically without having to store passwords in clear text.
- Classrooms use Safe AutoLogon to give access to students without having to manage passwords.
- Hospitals use Safe AutoLogon along side their internal single sign-on software to provide easy access for doctors, nurses, and other hospital personnel to access applications such as Epic®.

Safe AutoLogon™ gets your Windows desktops and servers logged in automatically and securely. Paired with Safe AutoLogon Password Server, automatic logons are synched with Active Directory for automatic logon and password management of 1 to 1,000,000 computers. Safe AutoLogon runs on all versions of Windows desktop and servers, Vista through 10, and Server 2008 through Server 2019.

Our software helps companies worldwide by decreasing costs and increasing uptime and reliability.

Our solutions target problems that exist everyday within all organizations, regardless of size, industry, or location. From Fortune 100 companies, to SMBs, our software is installed worldwide, saving companies money and time, and increasing their ROI, along with avoiding unnecessary risk of system failures.

You can evaluate our software free of charge during its evaluation license period. When you are ready to purchase, you can do so online, through your sales representative, or through one of our 100+ resellers in over 15 countries. See how our software can provide your company real solutions that work.
